

AHMAD BISHARA

Boston, MA — (978) 810-7418 — Bishara.a@northeastern.edu — LinkedIn — GitHub — Portfolio

EDUCATION

Northeastern University — M.S. in Computer Science, Khoury College

Boston, MA

Relevant Coursework: Programming Design Paradigms, Database Management

Expected May 2028

In Progress (Fall 2026): Algorithms, Computer Systems

Endicott College — B.S. in Computer Science, GPA: 3.5 / 4.0

Beverly, MA — May 2025

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, SQL, C++

Frameworks: Spring Boot, REST APIs, React, React Native, Node.js, JWT, OAuth2

Databases: MySQL, PostgreSQL, MongoDB, Redis

Cloud & Tools: AWS (EC2, S3, RDS), Docker, Terraform, Git

Concepts: Object-Oriented Programming, Data Structures, Algorithms, Database Design, API Design, Microservices

EXPERIENCE

Bioinformatics & Software Development Intern — SynGAP Research Fund (Remote)

Sep 2024 – Jan 2025

- Delivered Python (Pandas) and R pipelines processing 10K+ genomic variants, enabling researchers to identify precision-medicine candidates 80% faster
- Built SYNGAP1 Mutation Viewer (Flask, Plotly) with sub-second query performance over 5,000+ variants; deployed as primary analytics interface for SRF researchers — *featured in Endicott College News*
- Presented analytics platform to 80+ clinicians at SRF 2024 Conference, driving adoption across the research community

Research Assistant — Endicott College Cybersecurity Lab

May 2023 – Aug 2023

- Owned end-to-end design of 6 modular cybersecurity labs adopted by 200+ students across 3 courses
- Automated AWS lab infrastructure with Terraform and Docker, reducing setup time by 70%

Software Engineer (Contract) — Female Fan Nation (Remote)

Sep 2022 – Dec 2022

- Refactored React frontend and REST APIs, increasing mobile conversion by 15% and scaling traffic to 50K+ monthly users
- Implemented real-time inventory APIs, improving checkout latency and reducing cart abandonment by 12%

PROJECTS

GamerHub — Java, Spring Boot, React Native, AWS, MySQL, OAuth2

github.com/ahmadb123/gamerhub

- Designed cross-platform identity system integrating Xbox, PlayStation, Steam, and Discord APIs over MySQL schemas managing 50K+ interactions
- Aggregated 4+ gaming APIs with a caching layer, reducing external API calls by 65%
- Implemented WebSocket chat supporting 1K+ concurrent users with sub-100ms latency

Real-Time Inhale Pressure Monitor — C++, ESP32-S3, Arduino Framework

github.com/ahmadb123/Arduino_Project

- Built an embedded pediatric respiratory monitoring device using ESP32-S3 and a pressure sensor with real-time data streaming
- Designed C++ firmware for low-latency sampling and threshold-based feedback to support breathing exercises for children

CalmMind — React Native, Spring Boot, MySQL, JWT, OpenAI API

github.com/ahmadb123/calmmind

- Built mental health platform with research-validated ECR-R attachment scoring and OpenAI-powered conversational support (sub-2s response times)
- Implemented JWT authentication supporting 5K+ active user sessions across iOS and Android
